**FIRST SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT**

Commissioner For Patents  
P. O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

Pursuant to 37 C.F.R. 1.97, 1.98, and 1.99, the art identified on the attached form (copies of which art are enclosed) and other matters discussed below may be helpful to the Patent Office in its examination of the application identified above.

Enclosed is a copy of the COMMUNICATION and attached EUROPEAN SEARCH REPORT (dated "05.10.04") for the European Application No. 04 10 2965.3 which claims priority of the above-captioned U.S.A. patent application. Also enclosed is a copy of each of the patents cited in the EUROPEAN SEARCH REPORT that were not cited to date in the above-captioned U.S. application. All of the cited patents are designated in the EUROPEAN SEARCH REPORT as being in the "X" category of "particularly relevant."

The document DE 199 38 058 A1 is in the German language and has not been translated. It appears to show, in FIG. 5a, a machine having an arrangement for moving components relative to a fixed object 23. FIGS. 2a-2h appear to show an outer, hollow, cylindrical element 2 and an inner cylindrical element 5 which can revolve in the directions "A" around the interior of the outer cylindrical element 2. An inner element 13 is located in the cylindrical element 5 so that the element 13 is offset from the longitudinal central axis of the cylindrical element 5. FIGS. 2b and 2f show how the cylindrical element 5 can rotate about its central axis 7 in the directions "B" as the cylindrical element 5 revolves around the interior of the outer, hollow cylindrical element 2. FIG. 4a shows the components with the central axis 14 of the inner element 13 oriented at an oblique angle to the plane of the fixed object 23.

CERTIFICATION UNDER 37 C.F.R. §1.97(e)

I hereby certify that each item of information contained in this First Supplemental Information Disclosure Statement was first cited in a communication from a foreign patent office (European Patent Office) in a counterpart foreign application not more than three months prior to the filing of this statement.

  
Paul M. Odell, Reg. No. 28,332

OCTOBER 13, 2004

The order of listing of the art on the attached Form PTO/SB/08A should not be construed as an indication of the importance of the listed art.

The Patent and Trademark Office Examiner is requested to review the art and determine the extent of the materiality of the disclosures thereof with respect to the patentability of the subject invention. It is expected that the Patent and Trademark Office Examiner will independently conduct a complete search for relevant prior art.

No inference should be drawn and no representation is made or intended: (a) that a search has been made, or if made, was complete; (b) that the art on the attached list presents a comprehensive investigation of the prior art; or (c) that art no more pertinent than that listed is in existence.. [See 37 C.F.R. §1.97(g)]

Citation of any art herein is not to be construed as an admission: (a) that the art disclosure is, or is considered to be, necessarily within the invention field of endeavor, pertinent to the instant invention, or equivalent to the instant invention; (b) that the art disclosure is, or is considered to be, necessarily prior in time to a particular date which may be relevant in the instant patent application; (c) that the art disclosure is, or is considered to be, material to patentability as defined in 37 C.F.R. §1.56(b); (d) that the art disclosure is otherwise necessarily prior art with respect to the instant invention and application; and/or (e) that the information, protocols, results and the like reported by third parties are accurate or enabling. [See 37 C.F.R. §1.97(g).]

Serial No. 10/606,641 - 4

No inference should be drawn that the discussion of any art herein is a discussion of each and every feature disclosed therein.

Also, there is reserved the right to later set forth how the instant invention is distinguished over the disclosures of any document or other art, including the disclosures of the art cited herein, that may be cited by the Examiner in rejecting a claim in the instant patent application.

Respectfully submitted,

Dated:

By:

Paul M. Odell, Reg. No. 28,332
